

DISPOSABLE ISOLATION GOWN

Product Description

Our Opia Medical Disposable Isolation Gown is designed to prevent infectious diseases and pathogens from infecting your clothes and spreading them to others. There are two types of isolation gowns; liquid resistant isolation gowns and impermeable isolation gowns. Liquid-resistant gowns repel light liquids such as blood and urine, but only for a short time as these can be absorbed into the gown after a while. Impermeable isolation gowns can withstand greater amounts of liquid and will not seep through the material and contaminate the garment. It is worn to protect healthcare workers, use for visitors, when the risk of fluid contact or penetration is low, including blood collection, suturing, or while working in a pathology laboratory. Production is made in various colors and sizes.

Technical Standards

It is breathable, waterproof, lightweight and easy to wear. Knitted or elastic cuffs are used optionally. Our products can be easily used by patients' relatives, patients, nurses, doctors and laboratory workers. It is produced as a double-tie waist and neck-tied or velcro system.

Our products are produced as Sterile and Non-Sterile.
